MEMORANDUM FOR: Chief, Policy and Plans Group

FROM:
Deputy Director of Security (P&M)

SUBJECT: APEX Single System

On 4 August 1980, the Director of Security asked that we do a redraft of the papers and change the major thrust. The following are the key points wants sent to him:

a. What are we trying to say to the DCI? He does not want a doom and gloom message, requesting a crash meeting. He wants a reasonably balanced paper that presents both sides of the issue.

b. Implementation. Stress that implementation is proceeding but it is safe to say that we have not reached the ideal in uniformity. There are still some differences in terms of PHS, DCID 1/14, use of polygraph, etc.

c. Acceptance. The spirit of APEX is being followed, but there is more disagreement within the U.S. Government than in industry.

d. Summary. The theme on APEX is "evolution" rather than "revolution" and we are making some headway. SECOM sees the problem and will look in due course at DCID 1/14, etc. This is an FYI status report to the DCI and there is no need for a 10-minute meeting.
